SUMMARY

Computer Science and Engineering undergraduate specializing in Data Science with strong foundations in programming, problem solving, and software development. Passionate about building impactful applications through AI, web technologies, and data-driven solutions. Experienced in hackathons, collaborative projects, and rapidly learning new technologies.

EXPERIENCE

Internshala Student Partner

June 2026 - July 2026

Internshala

- **Leadership & Campus Ambassador Experience:-** Develop leadership, communication, and marketing skills by representing Internshala in my campus.
- **Certificates & Recognition:-** Official certificates, badges, and recognition based on my performance and achievements.
- **Networking & Career Opportunities:-** Connect with students across India, gained exposure to recruiters, and access internships, training, and career opportunities.
- **Rewards & Incentives:-** Performance based rewards such as cash incentives, merchandise, vouchers, and exclusive perks for completing campaign targets.

AI Web Development Intern

June 2026 - July 2026

InAmiGos Foundation

- **Hands on Development Experience:-** Built real world websites and web applications using modern web technologies.
- **Industry Relevant Technical Skills:-** Strengthen skills in HTML, CSS, JavaScript, responsive design, version control (Git), and web development workflows.
- **Portfolio Enhancement:-** Complete practical projects that showcase abilities to recruiters and future employers.
- **Professional Growth & Career Readiness:-** Gained experience working in a team, improve problem-solving and communication skills, and understand industry best practices.

Education

Bachelor of Technology in Computer Science and Engineering

July 2025 - Aug 2029

Assam Science and Technology University, Guwahati

- CGPA: 7.73, Relevant Courses: Data Structures, Web Dev, Databases, Software Engineering

SKILLS

Languages	C/C++ , Python, Java,
Tools/Frameworks	Git, Github, Figma, VS Code, Postman
Databases	Microsoft SQL, MongoDB, Supabase,
AI Tools	Claude, AntiGravity, Stitch, Huggingface, Ollama, OpenCode

Recent Projects

Ocean_OS ([Github](#))

April 2026

An marine navigation system which collect information Social Media, Crowd reporting and the AI verify it with the data from INCOSI etc. and predict the weather situation on real time on the basis of Crowd Reporting data and INCOSI data.

PaddyPulse([Github](#))

July 2026

An intelligent climate tech platform designed to help rice farmers monitor field conditions, predict methane-prone situations, optimize irrigation practices, and estimate potential carbon credits. The platform combines environmental monitoring, AI-powered analytics, and sustainability insights into a single dashboard to promote climate-smart agriculture.
